

Ascent Capture ScantoNotes Module 4.1

TYPE OF APPLICATION

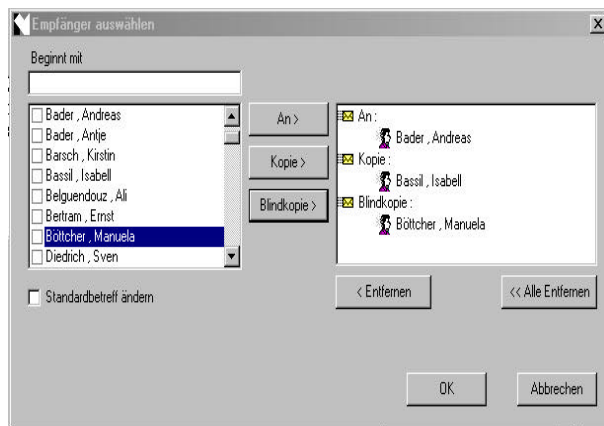

Extended module for Ascent Capture Version 4.0 and later.

TARGET GROUP / INDUSTRY

Ascent Capture - and Lotus Notes / MS Outlook users, industry independant

FEATURES

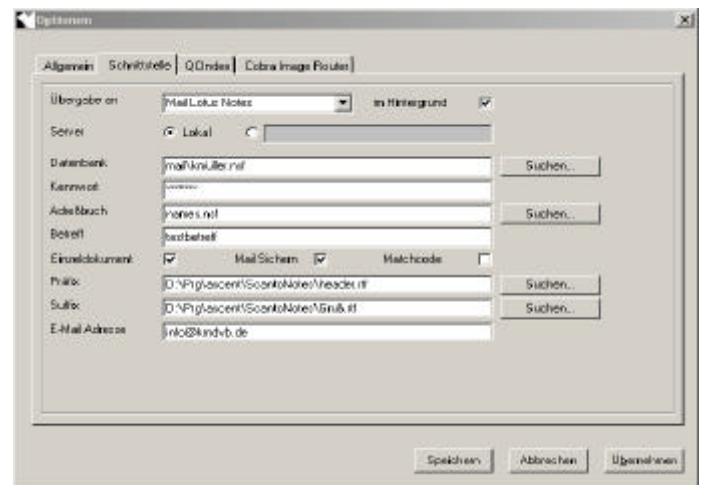

- selection of mail recipients out of Notes or Outlook according to batch- or documentlevel
- automatic sending of scanned documents as mail attachment
- support of Notes databases and diverse Notes applications on base XML configurable
- complete support of all Ascent Capture features, integration into Ascent Capture administration
- additional feature for indexhandling in the Ascent Capture Quality Control available
- additional support of Cobra Image Router to create searchable PDF's, also via FTP, available
- only little effort needed for customizations to customer specific Notes applications

Selection of Recipients in the Scan Module

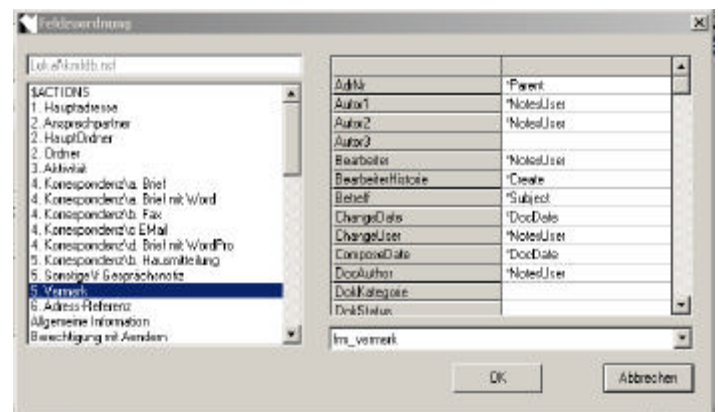

DESCRIPTION

Enterprises employing both, Ascent Capture and Lotus Notes or MS Outlook, can use the existing scan environment to create documents in the respective application. On the one hand scanned material can be sent to the specified recipients via e-mail. On the other hand Notes Databases and diverse applications, like CRM systems for example are supported: documents can be scanned referring to addresses, contact persons or projects.

Release Setup in the Ascent Capture Administration

Additionally ScantoNotes can be run in a silent mode: the release then happens without user interaction either to predefined e-mail addresses, or documents are created using Ascent Capture values, like indexfields, Barcodes a.s.o.. All Ascent Capture features as e.g. recognition functions or validation, including advanced features like XTrata or extended recognition engines like DOKuStar, could be used, because the submission of documents to Lotus Notes or Outlook is implemented as a separate releasescript.

Field Mapping for a Lotus Notes Form

SYSTEM REQUIREMENTS

- operating system : Windows 32 Bit, according to Ascent Capture
- Software : Lotus Notes 5.0.3 or later, Ascent Capture 4.0 or later
